Listing of certificates on Captin's Multilateral Trading Facility

From Monday, May 18th 2026, HZPC certificates issued by the HZPC Association can be traded on the multilateral trading facility of Captin B.V. (Captin). The trading period for Royal HZPC Group certificates will start again from that day, for a period of 10 trade days. From Monday morning 9 AM you can submit orders to sell and buy certificates. An important condition to be able to trade is that you have completed the onboarding process. The current value of the HZPC certificate is €109,59. During the trading period you can place orders within a bandwidth of 20% this price. The minimum price is €87.70 and the maximum price is € 131.50 and of course everything in between. Outside the group of persons who meet the quality requirements, it is not possible to trade in HZPC certificates.

In the interests of transparency, we hereby inform you of the number of mandatory sales. In addition, we share the purchasing strategy of Royal HZPC Group.

Mandatory sales

Article 5 of the information memorandum states that in special cases HZPC also operates on the stock exchange. HZPC does this among other things, in the case of mandatory sales where a certificate holder no longer meets the quality requirements that have been set. More information about the subject of mandatory sales and the way in which this is carried out on the platform can be found in the information memorandum via www.hzpc.com/captin.

For the upcoming trading round 3.787 mandatory sales are offered by HZPC equally spread over the trading period at a price of the first independent prices which has been made. If this cannot be realized, the certificates will be sold at a lower rate.

Personnel regulation

For a part of the personnel of Royal HZPC Group a certificate regulation has been granted as an employment condition.

For the upcoming trading round, HZPC aims to purchase a fixed number of 1.683 certificates under the scheme. No certificates will be purchased at a price higher than the highest price of the last independent transaction or the highest current independent purchase offer.

Connecting growers

HZPC started the Connecting Growers program to grow the ownership of certificates in active growers' ownership. With this program 1.5 million Euros worth of certificates are purchased on annually by Royal HZPC Group. This purchase is spread over 2 trading rounds. For the upcoming trading round, Royal HZPC Group aims to purchase 750,000 euros worth of certificates.

More information about Connecting Growers can be found at www.hzpc.com/cg.

Royal HZPC Group will purchase the certificates for this program during the upcoming trading round in the following way:

- HZPC will wait to buy until a first independent price has been made. By independent price is meant: a trade in which at least 1 non-HZPC affiliate is involved;
- HZPC then first buys the certificates for the personnel orders;
- After fulfilling the personnel orders, the Connecting Growers certificates are purchased. Hereby the last independent price is leading for purchase. No certificates will be purchased at a price higher than the highest price of the last independent transaction or the highest current independent purchase offer;
- Royal HZPC Group goal is to spread purchases as evenly as possible over the 10 trading days in each trading round;

There is only trading on the buy side and not on the sell side in the context of Connecting Growers. Each evening after the close of the trading day, HZPC communicates on www.hzpc.com the extent to which the forced sales have been realized. In addition, it is shared how many certificates HZPC has purchased from the personnel program and the Connecting Growers program. If the purchase strategy deviates from the above, a new purchase strategy will also be announced.

Kind regards,
M. Booijnck,
CFO Royal HZPC Group B.V.
